Education

Bachelor of Science in Computer Science
University of South Florida

August 2014 - May 2018

Experience

Software Engineer at Boson Software *April 2018 - Current*

- Engineered a mobile-first responsive redesign for a legacy .NET e-commerce application using custom Bootstrap and CSS.
- Launched a customer-facing video tutorial interface, integrating the Dacast API in .NET Core and Angular.
- Developed a foundational .NET Web API to centralize customer data, improving data integrity and system maintainability.
- Overhauled the e-commerce checkout system by streamlining the user flow and reducing steps to purchase.
- Automated build processing of scripts and styles to ensure they are production-ready.

Software Developer at Leapdoctor *September 2016 - February 2018*

- Developed a web based communication application for hospitals that reduces call time.
- Built with Node, VueJS, Socket.IO, Stripe API, and Twilio API.
- Developed a real time application that facilitates priority based shift scheduling for hospital staff.
- Provided a real-time automated scheduling system with MeteorJS, AngularJS, and MongoDB.
- Designed and published hybrid mobile apps to Android and iOS using Ionic and XCode.
- Facilitated deployment using AWS EC2.

Web Developer at Qypsys *July 2017 - December 2017*

- Created a front-facing business landing site.
- Developed using Express, Angular, and Bootstrap.
- Deployed using DigitalOcean.

Skills

C#, .NET, Javascript, jQuery, TypeScript, Node, Angular, Vue, SQL, Meteor, Socket.IO, MongoDB, AWS EC2, AWS S3, Python, Flask.

Achievements

- President of Freethinkers at USF 2015-2018
- Flit Path Cohort B Award 2017-2018
- USF Innovation Award 2014-2018
